## WEAPON OF THE MONTH

## THE FART GUN

Gun Control might be a good idea.

■ The Stink Blaster gun (\$25) from SpinMaster.com shoots a cloud of smelly air at a target. How does it work? Pull back the plunger to force air through the stinky filter. Then aim and pull the trigger. The gun coils the air as it is fired, so the stink is concentrated when it hits its mark. It's a great way to make strangers say, "Hey, what's that smell? How did you get it here? Get away from the dog!"

Still not as effective as our slingshot full of human excrement.
